I have rules configured in Auto-Mate Standard, and want to transfer them to Auto-Mate Pro.

Follow this procedure:

1. Close Outlook.

2. Uninstall Standard using Control Panel Add/Remove Programs.

3. Install Pro.

4. Start Outlook. There will be no rules. It will create the proper folder for the rules along with a blank database.

5. Close Outlook.

6. Copy the rules database (auto-mate.db3) from this folder:

Win XP

C:\Documents and Settings\<youruserid>\Application Data\Pergenex Software\Auto-Mate Std 3.0\

To this folder:

C:\Documents and Settings\<youruserid>\Application Data\Pergenex Software\Auto-Mate Pro 3.0\

Vista

C:\Users\<youruserid>\AppData\Roaming\Pergenex Software\Auto-Mate Std 3.0\

To this folder

C:\Users\<youruserid>\AppData\Roaming\Pergenex Software\Auto-Mate Pro 3.0\

7. Start Outlook.
