

What are the new features in Auto-Mate 5.0?

New Features for v5.0

Rule Enhancements

- Rules can be configured to include sub-folders.

- A new setting has been added to only process messages that are newer than the last rule

execution.

- Specify whether to match ALL properties (AND) or ANY property (OR) for rule matching criteria. In

older versions, it was fixed at matching ALL.

- The time interval between when messages are received, sent, or a message is moved into a folder

is configurable via an option setting.

- You can make bulk rule updates. This allows you to change settings across multiple rules at once.

- The forward action allows you to choose a message template to include.

- Rules can be configured to filter messages between two specified dates.

Rule Types

- Check if a message does not exist

- Find duplicates

- Execute Actions on a schedule

Rule Actions

- Added replace subject line completely in addition to prefix and append.

- The Print action has been updated to print attachments.

- Send a Message

- Execute an External Program

- Stop Processing Rules

- Flag Enhancements. You can set the flag type, the start and due date, and the reminder date.

- Attachment Enhancements

Rule Properties

- Match the attachment name

Scheduling

- Run once daily at a specified time has been expanded to include the specific day or all days.

Exceptions

- Except if in my Address book

- Except if in my Safe senders list

- Except if in my blocked Senders list

Auto-create folder naming additions

- By Domain Name

- By Year Quarter

- By Source Folder Name

Outlook 2010 Support

- Basic Ribbon Tab support, more to come soon.

User Interface Improvements

- Resizable window remember their size, position, and lists with columns remember their width.

- The Rule Manager window is non-blocking and can remain open while performing tasks in Outlook.

much more...
